

Applied Underwriting

Sign confidently and be protected

11/14/2018

Problem

Individual developers

cannot afford legal consultancy

- (1) user agreement
- (2) privacy policy
- (3) IP protection
- (4) ...

Individual users

are not capable to avoid

- (1) unfair treaty
- (2) improper terms
- (3) legal traps
- (4) ...

Solution

An **API Library** for standard terms processed from legal documents with companies like Google, Apple

where **individual developers** can

**SAVE
MONEY**

with free template

**SAVE
MONEY**

with endorsement

**SAVE
MONEY**

with potential lawsuit

Solution

An **API Library** to manage smart contract recorded on blockchain, with user-consent-provider

where **individual user** can

SAVE

EFFORT

reading signed terms

SAVE

EFFORT

worrying about caches

SAVE

EFFORT

managing identities

Market Validation

12 million

individual app developers unprotected

[Business of Apps]

\$114 billion

projected fine for data privacy breach

179 million user data breach in 2017 [statista]
each is subjected up to \$750 fine
will raise to \$7500 in 2020 [Fortune]

Market Size, for 1% share

1.14 billion +

data breach insurance
[Fortune]

240 million +

Patent infringement insurance
[BioLoquitur]

∞

User Identity
Social Credit

Product

Individual developers

API Library

define service → quote terms → add insurance

Individual users

API Library

Smart Contract

login profile → consent new terms → enjoy service

Term evolution

PoS on blockchain

propose change → call for new consents → new standard

Tech advantages

Legal Data

over 297k file of 965 company
still increasing

NLP expertise

start-of-art machine learning models
on best quality of data

Smart Contract

trust-driven design
innovational application

Blockchain

5% gas fee of conventional storage
tech-driven, PoS instead of PoW, no ICO

Summary

- Our attention is limited and precious
- NLP can break down page-long legal bindings
- Consent to one agreement at need is easy
- Universal consents can be done OAFA
- Valued attention will help iterate agreements
- WE build on social contracts and universal value

What We Need

Aligned Vision, Social Good

Matched Ego, Web 3.0

Abundant resources to carry
out aggressive strategies

“A society with trust is a species will last.”
